There's a growing TikTok conspiracy theory about the user that took this video being killed by the CIA to keep the existence of Giants secret. Also the video was filmed in Canada so I don't see why the Canadian government wouldn't be the ones to kill him. It seems to be getting some traction with Christians because they think the bible proves there are giants. Might be a future topic.

I just want to say that even if a script idea is daunting, I do not have any feelings of hate towards it. However, I think even if I love this whole thing... I still find myself dreading every single time I remember I have to find a video for these episodes. I think I am getting a bit better at knowing how to find videos and searching for them, but god I hope I get way better way sooner.

Anyway, this is my found footage. LET'S GOOOO.

But to honour my - weird shit washed up on shore habits - here's "Translucent jellyfish, with fish trapped inside it, washes up on UK beach | Live Science"

Hospital ghost Ghost wheel chair - wheelchair w/o person on it tracked through CCTV heading to a hospital in India, the original video I saw was from Argentina here where the guard 'checks in' a recently deceased patient to play along with their visit.
